

NURSING

Streaming Video Collection

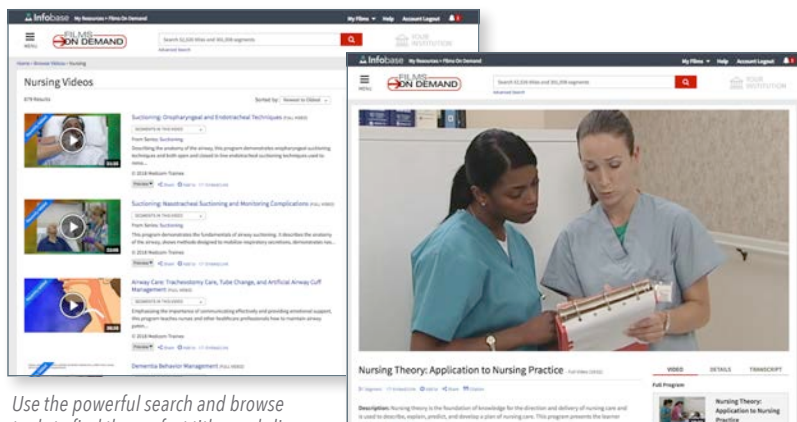

Includes:

- Diseases, Disorders, and Disabilities
- Nursing Foundations
- Nursing Skills
- Patient Care and Interventions
- Special Topics in Nursing

7,900+ video clips, **880+** full-length videos—and growing!

This collection is designed not only to help nursing students excel in their studies and pass licensure exams, but also to prepare them for long-term job success in an increasingly complex health care system. It features titles from trusted producers such as **Medcom-Trainex, Elsevier, Cengage Learning/Concept Media, Classroom Productions, Inc., NEVCO, Wolters Kluwer Health, Institute for Professional Care Education/Medifecta, PESI, Inc.,** and others.

- Conveniently segmented for lecture and in-class use
- Unlimited access from any location—on campus or off
- More than 530 hours of educational videos, lectures, and documentaries from top producers
- Custom Content Upload Option
- Captions, interactive transcripts, citations, Google Translate, and more
- New videos added at no additional cost
- Easily embed videos into Canvas, Blackboard, Moodle, or other CMS
- Tablet, mobile, PC & Mac friendly
- Create and share personalized playlists using segments from multiple videos
- Add a personalized video introduction to any playlist you create
- Keyword tags for all content, linking to related material

Use the powerful search and browse tools to find the perfect titles and clips for lectures and assignments.

Once you find the clips you need, use the Add to Playlist tool or the embed code to provide instant access for students through your online course management system.

NURSING STREAMING VIDEO COLLECTION

Collection highlights from these and other trusted producers:

Nursing Skills—with titles covering core clinical skills as well as the unique skills needed in emergency and medical-surgical nursing.

Diseases, Disorders, and Disabilities—includes videos on cardiovascular, infectious, and communicable diseases, learning disabilities, and

developmental, metabolic and endocrine, respiratory, neurological, and psychiatric disorders.

Patient Care and Interventions—covering the best practices of care for a wide range of conditions and scenarios, including geriatric care, home health nursing, abuse

and violence, hospice and palliative care, oncology, psychiatric care, gynecology and obstetrics, pain management, and pediatric and neonatal care.

Special Topics in Nursing—covering critical situations that nurses encounter in addition to their core responsibilities, including ethical and legal issues, health and safety for health

care providers, management and leadership, and medical research and advances.

Nursing Foundations—includes videos on anatomy and physiology, diet and nutrition, pharmacology, and lifespan development.

All programs are segmented into multiple pedagogical clips, convenient for intermittent use during classroom lectures or as assigned classwork.
